

Bluetooth Barcode Scanner User Manual

Performance

- Comfortable and convenient to use
- Long life time button--3 million times
- Built-in chargeable lithium battery
- Strong decoding capability
- Suitable for IOS, Android, Windows 7, Windows 8, and Windows XP

Packing list

- 1*Bluetooth barcode scanner;
- 1*charging cable;
- 1*charger (optional);
- 1*Bluetooth adapter;
- 1*user manual

Warning:

1. Please pull out the power supply and cable from the scanner in stormy weather to avoid damaging.
2. Keep away from heat and maintain ventilation.
3. Keep away from water in the environment of storage, transportation and operation.
4. Please use the original Bluetooth adapter of the device.

Bluetooth Barcode Scanner Knowledge

Bluetooth barcode scanner is used for pairing with the devices like smart phones, tablet PC, etc. It is suitable for IOS, Android, Windows 7, Windows 8, and Windows XP systems. With the high-performance processor and decoder, it has a rapid decoding and high precision reading ability. Bluetooth barcode scanner is developed to meet the needs of the changing world.

Housing Design Description

The Bluetooth adapter is used when the device has no Bluetooth function, for example, the desktop computer. If the device has Bluetooth function, the scanner can pair with the device directly without the adapter. For more details, please check the Bluetooth Adapter Installation Guide on page 2 to 3.

Technology Parameters

Physical Parameters

Size: 169mm*87mm*70mm

Weight: 135g±5g

Charging interface: RJ-45 plug, 2 meters (with 5V charger, red light for charging, green light for battery charged)

Housing material: ABS+PVC+PC

Performance Parameters

Light source: visible laser diode, wave length 650nm

Trigger mode: manual (long press the button to turn off the scanner)

Scanning mode: single line scanning

Scanning speed: 120 scans/sec

Resolution: ≥4mil

Error rate: 1/50million

Scanning resolution: minimum 35% contrast

Transmit frequency: Bluetooth

Transmit distance: visible distance 10m (customized)

Depth of scanning field: 10mm-600mm

Scanning angle: ±35°±65°±65°

Decoding capability: UPC/EAN/JAN, code 11, code 128, code 39, Chinese 2 of 5, Interleaved 2/5, Interleaved 2of 5, China post code, etc.

Prompt mode: beeper& LED

Setup mode: manual (scan the setting barcodes)

Laser safety level: EN60825-1, Class 1, National Class 1 Laser Safety Standard EMC

EMC: EN55022, En55024

Electric safety: EN60950-1

Electrical Parameters

Charging time: 4 hours

Charging voltage: DC5V±5%

Power: 50MW (operation), 500MW (maximum)

Currency: 50MA (operation), 100MA (maximum)

Environmental Parameters

Light intensity: 3000-12000LUX

Temperature: 0℃-50℃ (operation mode);-40℃-60℃(storage)

Package level: IP 52

Shock resistance: design to fall from 1.5 meters height from concrete surface

How to Use

Power On

Press the button. The scanner will emit two short beep sounds and the indicator light will blink. That means the scanner has been successfully turned on.

Power Off

The default shutdown time is 5 minutes. If there is no operation within 5 minutes, the buzzer will emit a long beep sound and then enter into sleep mode with the indicator light off.

2 ways to enter into Paring Mode In Wireless Mode

1. Press the button continuously for 10 seconds.
2. Scan "one-key pairing" bar code

(one-key pairing)

Attention please:

Do not press any button while pairing (blue LED flashes), otherwise pairing fails and it needs to be redone.

Bluetooth Adapter Installation Guide-Windows XP

1. Plug in the Bluetooth adapter. Bluetooth device icon will show on the system tray.
2. Double click the Bluetooth icon then the Bluetooth device dialog box will appear. (You can also click the Bluetooth device from the control panel.)
3. Click 'add' and the Bluetooth device wizard will show.
4. Scan the setup code 'One-Key pairing' or press the trigger button for 10 seconds in order to let the Bluetooth scanner get into matching condition. The blue LED light flashes quickly. Select 'My device is set up and ready to be found' and click 'next'.
5. There will be a Bluetooth device wizard dialog box that shows 'Barcode Scanner' icon. If not, click 'search again'.
6. Double click 'Barcode Scanner' icon and see the passkey dialog box.
7. Select 'don't use a passkey' and click 'next' to start installing the driver.
8. After installation, there will be an extra Barcode Scanner in the Bluetooth device and an extra HID Keyboard Device in the device manager. By this time the bluetooth adapter installation will be finished.
9. Now open any edit box like notepad to start reading and uploading bar codes.

Bluetooth Adapter Installation Guide-Windows 7

1. Plug in the Bluetooth adapter then the Bluetooth icon will appear.
2. Double click the Bluetooth icon and then the 'Devices and Printers' will appear.
3. Activate the scanner and scan the setup code 'One-Key Paring' or press the trigger button for 10 seconds, then blue LED light flashes quickly and the Bluetooth scanner enters to the matching condition.

4. Click 'add a device' and there comes a dialog box that shows 'Barcode Scanner'.
5. Right click the device icon and right click again to select the properties.
6. Select 'Drivers for keyboard, mice, etc [HID]' in the properties dialog box and click yes.
7. After installation there will be a balloon to show installation success. The device manager has a new HID keyboard device.
8. Now the Bluetooth installation finished. Open any edit box like notepad to start reading and uploading bar codes.

Bluetooth Adapter Installation Guide-Windows 8

1. Plug in the Bluetooth adapter.
2. Open 'control panel' and click 'add a device'.
3. Activate the scanner and scan the setup code 'One-Key Paring' or press the trigger button for 10 seconds, then blue LED light flashes quickly and the Bluetooth scanner enters to the matching condition.
4. Click 'add a device' and there comes a dialog box that shows 'Barcode Scanner'. Select the device and click 'next'.
5. Now the Bluetooth installation finished. Open any edit box like notepad to start reading and uploading bar codes.

Paired with Android/IOS/MAC Devices

1. Please confirm the scanner is in pairing mode. Otherwise, the device can't search the scanner.
2. Click the searched Bluetooth device directly. It can finish the pairing automatically.

Wired and Wireless Mode Switchover

If need to switch to wired mode, please scan 'Wired mode' setup bar code as below.

Wired mode

If need to switch back to wireless mode, please scan 'Wireless mode' bar code as below.

Wireless mode

Charging

Please connect the RJ45 interface of the charging cable to the bottom of the scanner and the USB interface to the computer. Or, connect the charger to the power socket. Charging time will be 2-3 hours. After fully charged, the scanner can work 8-12 hours continuously.

Reading Angle

- Maintain a bevel between the scanner and the barcode to make a best reading.
- Do not keep the scanner in 90° with the barcode, otherwise the scanner can't read.
- The scanner must aim at the barcode and the beam must cover the whole barcode. If don't, error maybe occur.

LED Indicator & Beeper

Indicator Light Color	Instruction
Green light and will be off soon	Reading successfully and comes a short beep
Red light always on	red = charging scanner no light = full charge
Blue light blinking	Press the button for 10 seconds. The blue light blinks and scanner enters into pairing mode. After pairing successfully, the blue light is on always.
Beeper Sound	Instruction
A short beep	Reading successfully
A long beep	Auto shutdown and enter into sleep mode
Two short beep	Power on
Three short beep	Fail to upload data. Please pair again
Three long beep	Low power, please charge.

Scanning Mode Setup

Setup Instruction :

1. Normal mode means real-time transmission. Scan 'Normal Mode' bar code, the scanner will be in real-time transmission.
2. In inventory mode, the scanner will save the bar code it reads. When need to upload the data to computer, scan 'Upload Data' bar code.
3. Scan 'Total Number of Data' bar code, the computer will show how many bar codes the scanner reads under inventory mode.
4. Scan 'Clear Data' bar code means clear all the bar codes being read under inventory mode.
